

-Fire Slime-

Materials Needed:

- 1 tsp. Borax
- 4 oz clear glue
- Red, orange and yellow food coloring
- 3 bowls
- 4 oz warm water
- Red glitter

Instructions:

1. Pour the glue, warm water and borax into the bowl and mix well with your hands.
2. Divide slime into three separate bowls.
3. Use the food coloring to die one red, yellow and orange and add red glitter to each.
4. Mix the glitter and slime individually in their bowls, then mix all the three bowls of slime together. This will give you a mixture of the colors but know that the more the students play with the slime and mix it together, the less the individual colors will show.
