DEERAGE

To Whom It May Concern:

Here at DeerAge.com we have a team of highly qualified histotechnologists and have perfected our system for providing Cementum Annuli Aging. What sets us apart from our competitors is our custom software system that barcodes each individual tooth for both speed and accuracy.

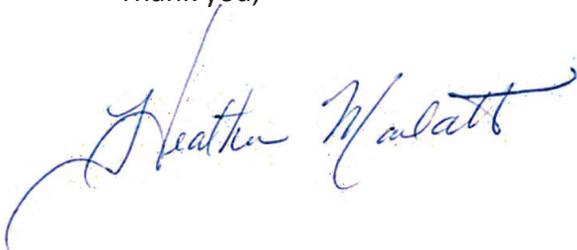

We have fine tuned both our decalcification and staining technique such that it yields crisp clear lines making deciphering the age so much more precise. See images below as an example of our quality on Black Bear aging.

The feedback from other states that have switched to our service has been very positive. With our digital system you'll have access to your results as they are rolling out which can be downloaded any time. Inside our digital system you can also easily request a free second look of any tooth. At the end of the years shipment we will also email a csv of the collated results as well as attach it to your order in your customer portal.

We would love the opportunity to earn your business and look forward to providing exceptional service.

Thank you,

**Sam Treece**

8/8/2025

To Whom It May Concern,

I am writing to offer my recommendation for DeerAge.com based on my experience working with them in my position as FWP Wildlife Technician Supervisor, as they provided tooth aging services over the past four years for the Chronic Wasting Disease (CWD) monitoring program.

DeerAge.com has consistently provided accurate, reliable, and timely aging results. Accurate age data is incredibly informative to managing CWD in Montana, and I have always been impressed by the quality and consistency of their results. Their reports are clear, well-documented, and delivered in a timely manner. This has allowed for me to integrate their findings seamlessly into our program's data analysis and management strategies.

One of the things I appreciate most is how easy they are to work with. They've worked with me to streamline the entire process to fit my needs. From sample submission to receiving results, making it incredibly simple and efficient for me to retrieve the results I am looking for. Their website is user-friendly and well-designed, and they have worked with me to make my data easier to retrieve in the format I prefer. It's evident that they've put a lot of thought into making their service accessible and hassle-free.

In addition to their technical proficiency, the team at DeerAge.com has always been responsive to my questions and requests. They've gone above and beyond to provide clarification when needed and have proven themselves to be trusted collaborators who understand the importance of precision of data in wildlife disease management.

I confidently recommend DeerAge.com to any organization or agency seeking dependable and accurate tooth aging services. Their expertise and customer service are excellent, and I look forward to continuing our partnership in the future.

Please feel free to contact me at 406-577-7883 or Sam.Treece@mt.gov if you would like to discuss our experience further.

Sincerely,

Sam Treece
